Subject: LTI Contracting Letter of Recommendation

To Whom It May Concern:

In late 2016, SK Food Group broke ground on a state-of-the-art, 215,000 SF USDA inspected food assembly and cold storage distribution facility in Tolleson, AZ. The overall project was completed in 9 months from groundbreaking to revenue and is recognized as a leading operation for SK Food Group. Due to the tight timeline, the project required an organization that could quickly adapt to the mobilization schedule, materials procurement and scope demands as well as work well with the other sub-contractors.

LTI Contracting was awarded the bid to construct all our food processing and storage spaces utilizing insulated metal panels and specialty doors for a variety of temperature zones (ranging from -10 degree F to 85 degrees F) and wash down conditions. LTI took the time to understand our needs, conditions and environments, in order to make sure that we received the installation we needed. They were also very attentive to details in finishes. They provided realistic and economical solutions to issues encountered in the field. LTI worked seamlessly with the other trades to ensure that everyone met their timeline and had space available when needed.

I found LTI's services to be highly professional, competitive and efficient. LTI Contracting was the right choice for this project, as they delivered on time and on budget. Even after the project completion, LTI continues to remain easily reachable and accessible to answer questions.

Based on the proven ability of LTI Contracting to deliver, I would highly endorse their services for future projects and look forward to using them again.

Mike Larkin
