November 15, 2005

Mr. Foster,

I have recently had the opportunity to work with LTI on the Reser's Fine Foods project in Topeka KS. I came to Topeka from the Portland OR. Market place, which in my opinion is far more professional than the Topeka market place. That being said, there were certain subcontractors who left much to be desired, others who met expectations, and 1 that exceeded all hopes that I could have had. LTI's performance far surpassed all of my expectations; they were the most professional, productive, and cooperative crew On the jobsite (not to mention the cleanest by far, a personal issue with me).

Verl Stack, and John Thornton are to be commended for a job well done, they set the bar for professionalism, (a fact that has been brought to my attention by even the poorest performing sub on the job). On two occasions Dave Leon was onsite for LTI for brief durations, and demonstrated that the quality and professionalism that we experienced on the Reser's project is an accurate representation of your organization.

Rounding out the Reser's LTI team is Bob Henriksen, Bobs attention to the project and prompt attention to our clients continually changing needs enabled us all to meet the clients deadlines.

It has been my great pleasure to work with Verl, John, Dave, and Bob! They are all most welcome at anytime anywhere. Reser's/Robinson Construction will be expanding the distribution center in Halifax NC in 2006 and I hope to see Verl and John again.

Sincerely,

Bob Kantola  
Superintendent  
Robinson Construction Co.
