Re: Ingles Markets,
Black Mountain, NC

To: Whom it may concern,

I am very pleased to provide this letter of recommendation to LTI Contracting for the work they performed on the recently completed expansion for Ingles Markets. Their scope of work included furnishing and installing more than 480,000 square feet of insulated metal panels, 2,200,000 board feet of floor insulation and approximately 90 cold storage doors.

I found their employees to be well educated in their scope of work and most competent in the performance of their work. At no time during the one year duration of the project did LTI fail to properly man the project, and complete their work within the project schedule. They performed their work in a safe and efficient manner and demonstrated great flexibility to adapt to changes in sequencing and schedule and worked well with all other subcontractors on the project.

The quality of their finished product is outstanding, as evidenced by the very few punchlist items noted for their work, as well as the positive comments I have received from the owner.

I, as well as my field supervision, have enjoyed a fine relationship with LTI and would not hesitate to work with this quality firm again in the future.

If you have any questions or need any further information please give me a call.

Sincerely,

Ken Sparks
